Skills

- **Languages**: C++, JavaScript (ES6+), Python,
- **Frameworks**: React, Node.js, Django, Flask, PyTorch, Scikit-learn
- **Tools**: Git, REST APIs, N8N, LangChain, LangGraph
- **Databases**: MySQL, MongoDB
- **Soft Skills**: Problem-Solving, Team Work, Project Management, Adaptability

Internship

Oibre Technologies | Software Development Intern | *Offer Letter* — Since September 2025

- Developing AI-driven features using LangChain, LangGraph, advanced prompt-engineering, and n8n automation pipelines to enhance intelligent workflows and system capabilities.
- Collaborating with senior developers in daily stand-ups, feature discussions, and code reviews, contributing to architectural decisions and implementation strategies.
- Building and refining internal AI tools, documenting workflows and API integrations, and supporting testing, debugging, and performance optimization to improve overall project quality.

  Tech: N8N, LangChain, LangGraph, Python, JavaScript, Git, APIs, Workflow Automation

Projects

AI Research Blog – Flask Application | GitHub — September 2025

- Created an automated Flask system that fetches AI research papers from arXiv and generates detailed blog posts using Groq AI, replicating an n8n workflow in a standalone application.
- Designed a responsive Bootstrap 5 UI with search, filters, pagination, manual HTML blog creation, and interactive post-management features.
- Implemented a scalable backend with Flask, SQLAlchemy, and APScheduler, enabling scheduled daily blog generation and achieving 95%+ topic relevance while reducing manual curation time by ~70%.
  Tech: Flask, SQLAlchemy, Bootstrap 5, APScheduler, PostgreSQL/SQLite, Groq API, arXiv API, Jinja2 Templates, REST API Architecture.

ChefAssist – AI Recipe Generator & Food Lovers Community | GitHub | Live — July 2025

- Built an AI-powered recipe generator using the Gemini API that delivers personalized dish suggestions based on ingredients, dietary needs, and user health profiles.
- Developed a modern, responsive frontend (React 19 + Tailwind CSS) and a scalable backend (Node.js, MongoDB), enabling smooth navigation, secure data storage, and seamless community interactions.
- Achieved 90%+ recipe accuracy and reduced user meal-planning time by 50%, making the platform a highly efficient, community-driven cooking assistant.
  Tech: MERN Stack, Vite, Tailwind CSS, React Router, LLM Integration (Google Gemini API).

Certificates

- Essentials Automation Certification | Automation Anywhere — November 2025
- Master Generative AI & Generative AI tools| Infosys — August 2025
- Full Stack (MERN) with Gen AI | W3grads — July 2025
- Live course Python towards AI/ML | CSE pathshala — March 2024
- Certificate of Internship in Artificial Intelligence | Interns Elite — March 2024

Achievements

- **Adobe India Hackathon |** Certificate — July 2025

  Qualified for the next round of the Adobe India Hackathon after successfully clearing Round 1 (Online MCQ + Coding) as part of Team Slayers from LPU.

- **Code-A-Hunt 24-hour Hackathon |** Certificate — February 2024

  Participated in the Code-A-Hunt 24-hour Hackathon by CodingBlocks LPU and qualified for Round 2.

Education

- **Lovely Professional University** — Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.4*** — *Since August 2023*
- **Narayana Junior College** — West Godavari, Andhra Pradesh
  Intermediate; ***Percentage: 90%*** — *April 2021 - March 2023*
- **Narayana English medium School** — West Godavari, Andhra Pradesh
  Matriculation; ***Percentage: 96%*** — *April 2020 - March 2021*
